

1. COVER LETTER

March 12, 2018

Important Communication Regarding a Proposed Sewer System in Your Area – Region C

Dear LaGrange County Property Owner,

The Board of Trustees and management staff of the LaGrange County Regional Utility District are pleased to inform you that the detail design stages are underway for a public wastewater-collection system as well as a wastewater treatment facility (the “Project”) to better serve you, your neighbors, and to support the overall need for economic and residential growth in your community. The Project will help improve and maintain ground water quality in your area as well as that of the lakes, rivers and streams. You have received this packet because preliminary design plans for the Project include one or more properties owned by you.

Enclosed in this folder is important information about the Project and how it will impact you as a property-owner. We urge you to review it carefully and store it in a safe place with your other important documents. Below is an outline of what is contained in this packet of information:

1. This Cover Letter.
2. Current status of the Project and preliminary timeline for completion.
3. Information concerning Utility Easements and an agreement form.
4. Planning for your connection(s) to the new system.
5. Information concerning statutory connection waivers.

Thank you, in advance, for your time and attention to this important matter. If you have further questions please contact our office at any time. We encourage you to plan to attend a future public meeting or one of our workshops that are scheduled in the coming weeks. Please visit our website, www.lagrangecountywatersewer.com, where updates will be posted as they become available.

Sincerely,

Adam Sams
General Manager,

Jeanette Combs
