

2. PROJECT STATUS

Proposed Region C Wastewater Collection and Treatment System Project (the “Project”)

Status and Preliminary Timeline

All preliminary planning and engineering design work required to proceed to the next stage was completed in 2017, culminating in the submission of an application for financing from the Indiana State Revolving Fund in December. Below is an outline of key milestones with preliminary completion dates that are subject to refinement as the Project moves through the next stages of development.

Please note that the project is not finally approved for construction until bids are received, a contract awarded, and a notice to proceed with construction issued by the District.

Month & Year	Major Project Milestone
December, 2017	Completion of preliminary design of wastewater collection and treatment systems.
December, 2017	Submission of application for financing to Indiana State Revolving Fund.
March, 2018	Notification from SRF of approval of preliminary engineering and financing terms.
June, 2018	Completion of all aspects of detail engineering design & specifications.
August, 2018	Closing on SRF construction grants and loans.
July, 2018	Request for construction bids.
September, 2018	Begin billing property owners monthly for debt-service payments.
August, 2018	Bid awarded, construction contract signed, and notice to proceed issued.
September, 2018	Construction begins.
September, 2019	Construction completed.
October, 2019	Notice to connect letters mailed to property-owners.
October, 2019	Begin billing property owner’s month for full sewer rate.
April, 2020	Deadline by which structures on all properties included in Project must be connected.
