Re: Region C Wastewater Project

Dear Potential New Wastewater Customer,

LaGrange County Regional Utility District Board of Trustees approved the Preliminary Engineering Report (PER) on December 21, 2017, for submission to Indiana State Revolving Fund (SRF). In anticipation of their approval of the PER we would like to have property owners fill out an informational sheet and return it to the district. This will allow the project engineers to get the information of where some of the utilities on your property is located. If you do not know for sure that is ok as well. Please follow the instructions on the enclosed forms. If you have any questions please feel free to contact us and we will be more than glad to help you through the form.

Also, in the next couple of weeks, you will be receiving an informational packet with important information regarding easements (both construction and permanent), guidelines of connecting to the grinder pump and much more information that is very important for you to retain for the future.

Respectfully,

Adam Sams
